Art Unit: 2877

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method for measuring a <u>true mean</u> differential group delay, classified in class 356, subclass 73.1.
- II. Claims 11-20,32, drawn to a method for measuring <u>mean</u> differential group delay, classified in class 356, subclass 73.1.
- III. Claims 21-30,33, drawn to a method for measuring <u>mean square</u> differential group delay, classified in class 356, subclass 73.1.
- IV. Claim 31, drawn to a method for measuring a mean polarization mode
 dispersion, classified in class 356, subclass 73.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

Art Unit: 2877

does not require the particulars of the subcombination as claimed because each group uses different methods and measures different characteristics of a fiber. The subcombination has separate utility such as measuring a mean polarization or a mean square or mean differential group delay.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu T. Nguyen whose telephone number is (571) 272-2424. The examiner can normally be reached on T-F 7:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Toatley Jr. can be reached on (571) 272-2800 Ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
